Solinst® Levelogger 5 Adaptors

More Info | Instructions | Get Quote

For use with Model 3001/3002

Overview

A significant physical difference between Levelogger 5 Series dataloggers compared to all previous versions (including Edge and Gold Series), is one large optical eye/lens versus two smaller optical eyes and pin connection at the communication interface. As such, adaptors are available to ensure new and old Leveloggers are able to use all deployment and communication accessories.

The **L5–Edge DRC Adaptor** (114261) allows the connection of Levelogger 5 Series dataloggers to previous versions of the USB Optical Reader, Optical Adaptors, and Direct Read Cables. The **Edge–L5 DRC Adaptor** (114262) allows the connection of Levelogger Edge/Gold Series dataloggers to the Desktop Reader 5, Field Reader 5, L5 Threaded and Slip Fit Adaptors, and L5 Direct Read Cables.

Levelogger 5
Optical Eye/Lens
